

Natural Coco Matting Specifications

Natural coconut fibers brush away dirt and moisture to preserve floors and lessen maintenance. Common uses are entryways, vestibules, and foyers with multi-directional traffic flow. We recommend a loose lay installation in a recessed well. Vinyl reducer is available in black if there is not a well. The recommended subfloors are concrete or APA approved plywood underlayment.

Aronson's stocks 5/8" Natural coco matting and cuts to size for 24-hour turnaround. All other thicknesses and colors are special order and typically have a 1-week lead time.

6633.6633 Natural

SPECIFICATIONS:

Typical Use:	Entry mats
Material:	Natural coir, coconut fibers
Backing:	Vinyl
Thicknesses:	Varies, see chart
Width:	6'-6"
Total weight:	1.36 lbs / sq ft (for 5/8", varies with thickness)
Testing passed:	ISO 1776 ISO 8543 ASTM D2859

Notes:

- Natural coco matting is made of coir (coconut fibers) yarns and no dyes, bleaches or coloring agents.
- There could be a color variation / streaking in the length.
- Shedding is common on new installations.
- Specs may vary at the time of order.

Available thicknesses:

Dyed Coco Matting Specifications

Dyed coco fibers brush away dirt and moisture to preserve floors and lessen maintenance. Common uses are entryways, vestibules, and foyers with multi-directional traffic flow. Dyed matting comes in 5/8" only. For other thicknesses see Natural coco matting.

We recommend a loose lay installation in a recessed well. Rubber reducer is available in black if there is not a well. The recommended subfloors are concrete or APA-approved plywood underlayment.
