

Coco Mat, Matting Specifications

Revised: 02/22/24

Natural

Natural

Charcoal

Brown

Dark Grey

Medium Grey

Application:	Commercial
Fiber:	Natural coco fibers
Colors:	5 colors
Custom colors:	N/A
Width:	6'-7" (2m)
Length:	39'-4" (12m)
Texture:	Cut pile
Pile weight:	6.6 kg/m ² (195 .84 oz/yd ²)
Total weight:	1.36 lbs/sf 1.43 lbs/sf 1.52 lbs/sf
Pile thickness:	5/8" (17 mm) 3/4" (20 mm) *natural only 1" (23 mm) *natural only
Flammability:	ASTM D2859 CPSC FF 1-70
Primary backing:	Vinyl
Country of origin:	China
Castor chair protectors:	Recommended
Warranty:	6 months limited warranty
Environmental:	Environmental Product Declaration available upon request

Coco Mat, Broadloom Maintenance

Revised: 02/22/24

Routine Cleaning

Vacuum the carpet with a heavy-duty commercial vacuum (rotary brushes recommended) to remove all dirt and grit. This is the single most important maintenance activity for preserving the floor's appearance and performance – and typically the most overlooked and omitted. Post “wet floor” signs.

1. A slow pass against the carpet pile is more effective than several quick passes.
2. A vacuum brush will open up the tufts.
3. Agitation will loosen the soil.
4. Slow movement allows time for air to circulate through the face of the yarn and extract the soil.

Periodic Cleaning

Absorbent powder is recommended for interim cleaning. The powder contains a carrier, which incorporates a solvent and detergent so that oil and water debris can be absorbed by the powder.

1. Spread the powder on the carpet.
2. Allow the powder to absorb dirt and moisture from the carpet.
3. Vacuum the carpet with a heavy-duty commercial vacuum (rotary brushes recommended)

Deep Cleaning

Eventually the carpet will require more intensive cleaning. The frequency of such cleanings will depend upon the amount of traffic in the area. The most effective method for deep cleaning is hot water extraction.

1. Move any furniture or fixtures to expose the entire carpet.
2. Vacuum the carpet to remove any loose soil to allow the extractor to be as effective as possible.
3. Plug in the extractor and allow the wash tank to heat the water. Add defoamer to the extraction tank
4. Inject the steam into the carpet according to the instructions on the machine you are using.
5. Pull the cleaning wand slowly toward you.
6. Close the cleaner dispenser valve just before your first line so the solution won't “puddle”.
7. Lift the wand and return it to the original position and then pull it again to vacuum up the excess water.
8. Begin a new line with it slightly overlapping the previous one.
9. Work quickly to avoid over-wetting the carpet. Do not let the carpet soak. Excess water can shrink the backing.
10. Allow the carpet time to dry completely and vacuum it again.

Spot Removal

1. Solvent > blot > detergent > blot > water > blot
2. Detergent > blot > ammonia > blot > detergent > blot > water > blot
3. Solvent > detergent > blot > water > blot
4. Detergent > blot > white vinegar > detergent > blot > water > blot
5. Detergent > blot > ammonia > blot > white vinegar > blot > water > blot
6. Detergent > blot > white vinegar > blot > ammonia > blot > water > blot
7. Freeze with ice cubes > shatter with blunt object > vacuum > solvent > wait several minutes > blot.
8. Blot > water > blot > ammonia > detergent > blot > water > blot
9. Denatured alcohol > blot > white vinegar. Repeat if necessary
10. Call a carpet cleaning professional
11. Use cold ingredients detergent > blot > ammonia blot > detergent > blot > water > blot
12. Detergent > blot > vinegar > blot > ammonia > blot > detergent > blot > water
