LUNCH & LEARN

Oil vs Polyurethane: Aesthetic, Performance & Maintenance Differences

This lecture is accredited for 1 or 2 LU/HSWs.

A comparative deep dive into finish types, this course helps specifiers understand how oil and polyurethane finishes affect aesthetics, performance, long-term maintenance, and environmental impact.

Learning Obectives:

a) Differentiate between oil and polyurethane finishes in terms of look, feel, and client expectations.

b) Understand the maintenance and refinishing needs of each finish type over time.

c) Evaluate the environmental and indoor air quality implications of finish systems.

d) Learn how finish choice impacts wear, longevity, and lifecycle cost in residential and commercial settings.
